

SOUNDTM SAFE

Play and protect
your smartphone
... anywhere

- Rugged, buoyant and waterproof.
- Built-in amplifier and 3" speaker.
- Up to 30 hrs battery life.
- Suits any smartphone or MP3 player which has a 3.5 mm headphone socket.
- Internal storage for keys and valuables.
- Available in black, white and yellow.

Ideal for beach, boat or
building site.

The Sound Safe is a tough, waterproof, floating case with a built-in amplified speaker, designed to connect to an iPhone*, iPod*, or MP3 player via the internal 3.5 mm headphone jack.

It's so easy to use, just select your music, plug in and adjust the volume. Once the cover is clicked into place, the waterproof, rugged housing will not only protect your device from the elements, it will transform your music into a louder, richer sound.

Take your music anywhere. Great for hiking, camping, biking, rafting and any other outdoor adventures where you have risk of damage from water, sand, dirt, grease, or shock. The high impact, shock resistant design withstands drops, falls and spills.

The spacious internal storage compartment will also protect your keys, credit cards, drivers license and cash as well as your MP3 Player.

Available in three colours, safety yellow, classic white and jet black.

SOUNDTM SAFE

The detachable carabiner allows you to attach the Sound Safe to your backpack to listen to music as you hike, or hang it up to play tunes in your tent or around the campfire.

The uniquely designed exterior pressure release valve ensures your case is water tight but always easy to open at low and high altitudes.

Additional filters available - FLT001
